

It has never been easier  
to find accurate protein interactions

## Matchmaker™ Gold

- *Identify novel protein interactions*
- *Study interactions in a Eukaryotic cell*
- *Define interacting domains*
- *Convenient preformulated media and screening reagents*
- *Unique yeast antibiotic that eliminates background*

Matchmaker Gold Yeast Two-Hybrid System with Mate & Plate Libraries is the simplest way to screen a cDNA library for protein interactions. This novel approach utilizes a yeast antibiotic in addition to 3 potent reporters, giving a faster and more accurate result with the well-established yeast two-hybrid technology.
