## Genomics Solutions

- Whole Genome Sequencing
- Exome Sequencing
- Target Region Sequencing
- High-throughput Genotyping
- Metagenomics
- RNA-Seq (Transcriptome/Quantification)
- Small RNA Sequencing
- Non-coding RNA Sequencing
- Degradome Sequencing
- ChIP Sequencing
- Reduced Representation Bisulfite Sequencing
- Whole Genome Bisulfite Sequencing
- MeDIP Sequencing

## Targets

- Causative Genes
- Gene Expression
- Common & Rare Variants
- Epigenetic Regulation
- Driver Mutations
- Metagenome

---

### The Sixth International Conference on Genomics

**Date:** 7-11 November, 2011  
**Venue:** Shenzhen, China

ICG-VI, the Sixth International Conference on Genomics, takes place on 7-11 of November, 2011. This conference aims to promote research in basic and applied genomics and lay the foundations of new approaches to sequencing and bioinformatics. BGI organizes this conference to create an environment conducive to information exchange, generation of new ideas, and acceleration of applications that benefit the international life science community. The conference is an opportunity to collaborate and explore new projects with those from all over the world. BGI welcomes everyone in the life sciences community to ICG-VI. We especially welcome your input and proposals to make ICG-VI the most comprehensive and successful endeavor possible.

### Important Dates:

- **Website Open:** Monday, 28 February
- **Early-bird Registration Deadline:** Monday, 15 August
- **Abstract Submission Open:** Thursday, 31 March
- **ICG-VI Start:** Tuesday, 7 November
- **Registration Open:** Thursday, 31 March
- **Online Registration Deadline:** Tuesday, 1 November
- **Abstract Submission Closed:** Friday, 30 September
