AICR, the Association for International Cancer Research, is working towards saving lives that are being lost to cancer. In future, those lives will be saved by improvements in prevention, diagnosis and treatment, but those advances can only be made tomorrow by investing in research today. That’s why AICR funds the very best cancer research proposals we receive, wherever in the world the projects will take place.

Over the last 32 years AICR has invested over £150 million into cancer research; supporting over 1800 projects in 32 different countries. Each year we award approximately £8.5 million to new research projects around the world.

Research Projects
- 2 grant rounds per year – April & October
- Support for a project grant is typically 3 years, but 2 year, and 1 year pilot studies are also considered
- Proposals must be on basic or translational cancer research
