

This conference will cover exciting new insights into the field of **cell death in cancer**, and there will be plenty of opportunities for interaction with some of the top experts in the field, including **Round Table Discussions**. We anticipate an **inspiring informal atmosphere** to share research findings, and to establish or strengthen collaborations.

Topics to be covered include:

- Mechanisms and regulation of classical apoptotic and non-classical modes of cell death
- Mechanistic insight into autophagy and senescence
- Therapeutic strategies modulating cell death in cancer cells
- Impact of cell death on immune responses to cancer and cancer therapies

Feedback from the 3rd edition of the conference in 2016:

97%

would recommend the conference to others

“ The conference has a friendly feel, represents excellent value for money (...) and gives plenty of opportunities for lively discussions and networking with peers. ”
