This conference will be relevant to participants from different fields of cancer research, including radiation biology, DNA damage responses, DNA repair, epigenetics, and cancer biology. We have created a programme that brings together basic scientists with translational and clinical researchers.

Topics

- DNA damage responses
- Epigenetic and metabolic impacts on DNA repair
- Interplay between transcription and DNA repair
- Immune responses in the context of DNA damage
- Implications for radiotherapy

Confirmed Speakers

Anthony Chalmers, UK  
Fabrizio d’Adda di Fagagna, Italy  
Sandra Demaria, USA  
Jessica Downs, UK  
Marianne Farnebo, Sweden  
Amato Giaccia, UK  
Peter Glazer, USA  
Roger Greenberg, USA  
Ester Hammond, UK  
Timothy Humphrey, UK  
Steve Jackson, UK  
Verena Jendrossek, Germany  
Gaëlle Legube, France  
Patricia Opresko, USA  
Laurence Pearl, UK  
Sven Rottenberg, Switzerland  
Conchita Vens, Netherlands
