This conference will be of interest to a diverse audience including pathologists, molecular pathologists and pathology residents, researchers in the field of molecular diagnostics and precision oncologists. The conference population will thus simulate the multidisciplinary teams that act in the real world to facilitate interdisciplinary research and the multidisciplinary teams caring for patients with cancer.

Topics

- Current views on molecular pathology
- Molecular pathology of colorectal cancer
- Molecular pathology of lung cancer
- Cancer models for biomarker discovery, from animal models to patient derived organoids
- New technologies in diagnostic onco-pathology.

Key Deadlines

- Abstract submission: 13 March 2020
- Bursary application: 13 March 2020
- Registration: 17 April 2020

Confirmed Speakers

- Reinhard Büttner, Germany
- Leonor David, Portugal
- Olli Kallioniemi, Sweden
- Leeat Keren, USA
- Peter Lichter, Germany
- Tamara Lotan, USA
- Ragnhild A. Lothe, Norway
- Johan Lundin, Finland
- Richard Marais, UK
- Gerrit Mejer, Netherlands
- Eli Pikarsky, Israel
- Mark Rubin, Switzerland
- Hege Russnes, Norway
- Ola Söderberg, Sweden
- Michael Speicher, Austria
- Luigi M Terracciano, Switzerland
- Inti Zlobec, Switzerland
