

3rd EACR Conference

Making it Personal Cancer Precision Medicine

5 - 7 November 2018 • Bergamo, Italy

The 3rd EACR conference on the topic of personalised medicine will update you on the latest challenges and advances in targeted and immunological cancer therapies.

We welcome all basic, translational and clinical scientists (including postdocs and trainees), who are interested in tackling pressing cancer-relevant questions, and who want to hear the latest developments in therapies targeting cancer and immune cells. We also invite industry scientists who are interested in targets for novel therapies.
